- Expandable Functionality
- 508 VPAT Accessible
- Online Student Form Completion
- Powerful & Reliable Reporting
- Easy Implementation
- Serving Customers Since 2007

Georgia Tech | Center for Inclusive Design and Innovation

» California State University, Fresno

"The customer service for the SAM program has been outstanding! Two years later they remain readily available and willing to explore options with us, it has been a great experience. If your data can be moved to an excel-CSV comma delimited format, then it will easily export into SAM."

- Director of Services for Students with Disabilities

» Gainesville State College

"My first response is "We love SAM". It has made everyone's job so much easier. Every staff member in the office uses SAM. After working with 13 databases in the past, it is wonderful to be able to pull up a student's account and be able to access almost any information you might need is great."

- Coordinator of Disability Services

» Clayton State University

"I found SAM to be extremely easy to use. It is very intuitive, encouraging the timely capture of necessary updates and case notes. The staff provided outstanding assistance in customizing it to our specific needs. Reports are simple to use and provide all that we need to fulfill our reporting requirements. Above all, the price is right and the support service is superb. I can't say enough good things about the SAM system and the support staff."

- Director of the Disability Resource Center
